## Foreword

The 1979 Edition of the North Carolina Pesticide Report represents a revision of previous issues. By elaborating on the purpose of this report, by adding new material, and by better defining the substances listed, we attempted to reflect in a more meaningful manner the information collected during the 1979 calendar year. We hope that more readers will be able to use it more effectively and be able to understand how its use can facilitate the pesticide industry from manufacturer to consumer.

This will also acknowledge and express our appreciation to the following people who made significant contributions to the contents and preparation of this Pesticide Report: *Pesticide and Plant Protection Division* - Brenda L. ## How to Use This Report

Considerable time and effort has gone into editing and organizing this 1979 edition of the Pesticide Report. Every section has been updated, new information added as necessary and details expanded to make this Report a more complete and up-to-date reference as to the sale and use of pesticides in North Carolina.

In this Pesticide Report you will find:

### Introduction

The Introduction accurately reflects the development of laws and regulations governing the sale and use of pesticides in North Carolina.

It also refers to certain divisions in the North Carolina Department of Agriculture that perform key roles in regulating and controlling the sale and use of pesticides in this State.

### Brief of the North Carolina Pesticide Law of 1971

This section presents a brief abstract of the North Carolina Pesticide Law of 1971. It also shows how and where to obtain a complete copy of the Law.

### Regulations Adopted by the North Carolina Pesticide Board

This section presents verbatim all regulations adopted to date by the North Carolina Pesticide Board under the Administrative Procedures Act.

### Pesticide Registrants, 1979

The names and addresses of firms or individuals who registered pesticides with the North Carolina Department of Agriculture during 1979 are listed in this section.

### Licensed Pesticide Dealers, 1979

### **Pesticides Examined, 1979**

This section presents in table form an alphabetical listing of the manufacturer of the pesticides that were sampled and analyzed in the Department's laboratories in 1979. Results of the analyses are tabulated and total numbers of each determination made are at the end of the table.

### **Samples at Variance From Guarantee, 1979**

This table lists the samples found by the Department's laboratories to be at variance from guarantee in 1979. The table also lists the name of each manufacturer, each pesticide brand name, and presents data and a description indicating how each sample examined varied from guarantee.

### **Other Violations, 1979**

This section gives the names of firms that manufactured or distributed products in North Carolina and had one or more violations under the North Carolina Pesticide Law of 1971. These violations constituted either unregistered or misbranded products examined at pesticide outlets but not sampled for analysis.

### **Summary of Regulatory Activities Performed Under the North Carolina Pesticide Law, 1979**

This section presents a summary of the total numbers of manufacturers who registered pesticides in North Carolina; pesticide formulations registered; pesticides examined; stop-sale, stop-use, or removal orders issued; licenses issued; and equipment inspections.

## Introduction

Pesticides cover a large number of materials and mixtures intended for destroying, controlling, or repelling pests such as insects, weeds, and other noxious plants, predatory animals and birds, soil-infesting pests such as nematodes, algae, snails, and bacteria. Other examples are disinfectants, antiseptics and fungicides for use other than on living man or other animals, defoliants, various repellents, fly paper and other adhesive products whose action goes beyond simple mechanics, moth proofers, wood preservatives other than common paints, mildew controls, and seed fumigants.

An adequate and readily available supply of many of these products is essential in the economical production of feed and fiber crops. The preservation of many products in storage and the control of domestic and industrial pests which affect both the health and welfare of human beings and animals are likewise dependent on such materials.

While the development and distribution of various pesticides to serve the needs are important, provisions must be present to protect the public. During the years 1947 through 1971 it was the purpose of the economic poisons law (North Carolina Insecticide, Fungicide, and Rodenticide Act of 1947, G.S. 4A, Chapter 106) to protect the public from adulterated, misbranded, worthless, and dangerous products, and legitimate manufacturers from unscrupulous competition.

During the years 1953 through 1971 the aerial application of pesticides was regulated by the North Carolina Aerial Crop Dusting Law, G.S. 4B, Chapter 106. The Law and the regulations promulgated thereunder, in summary required the registration and licensing of contractors and aviators who engaged in the custom application of pesticides by aircraft in North Carolina. The validity of a license was further restricted to the period of time that coverage by liability bond or insurance for damage by aircraft was in force.

During 1969 the North Carolina General Assembly through House Resolution 1392 directed the Legislative Research Commission to study the laws regulating pesticides in N. C. and report its findings and recommendations to the 1971 General Assembly. As a result of the findings and recommendations of the Commission, the North Carolina Pesticide Law of 1971 was adopted.

The N. C. Pesticide Law of 1971 established the North Carolina Pesticide Board as the governing body for the programs of pesticide management and control set forth in the Law. Provisions for regulating the use, application (aerial and ground), sale, storage, disposal and registration of pesticides are set forth in the Law.

The Law provides for the adoption of a list of restricted-use pesticides and requires the licensing of all pesticide dealers who sell restricted-use pesticides directly to users. Pesticide applicators and consultants are also subject to licensing requirements.

The Commissioner of Agriculture is responsible for administering and enforcing the Law and all rules and regulations adopted by the Board.

Each brand or grade of pesticide must be registered with the North Carolina Department of Agriculture before it can be legally offered for sale in the State. A \$25.00 registration fee for each brand or grade must accompany each Application for Registration.

As under the economic poison law, a state-wide inspection service will be maintained for the collection of official samples of pesticides from dealers. Individual requests for inspections are also made. As authorized, additional pesticide samples will be taken at the user level as they are being applied to determine if they are being used in an approved manner. Samples of the commodity to which pesticides have been applied will also be taken when deemed appropriate.

Samples are sent to the Department's laboratories for analysis. Reports of analytical results are forwarded to manufacturers, dealers, and users. As a further means of reporting, the Pesticide Report covering a year's work as exemplified herewith, is published annually.

# Brief of the North Carolina Pesticide Law of 1971

North Carolina Pesticide Board

Commissioner of Agriculture, Raleigh, N. C.

North Carolina Pesticide Advisory Committee

Governing Body

Administrative  
and Enforcement  
Authority

Assists the Board and  
Commissioner in an  
advisory capacity

Restricted-Use  
Pesticides

Any pesticide may be designated as a "restricted-use pesticide" upon the grounds that in the judgment of the Board it is so hazardous or injurious to persons, pollinating insects, animals, crops, wildlife, lands, or the environment that additional restrictions on its sale, purpose, use, or possession are required. Restricted-Use Pesticides include any pesticide required by the Environmental Protection Agency to bear the designation on its labeling "Restricted-Use Pesticide." (Restricted-Use Pesticides have been established by regulation.)

All pesticide dealers who sell restricted-use pesticides must be licensed. Application for a pesticide dealer's license must be accompanied by a fee of \$25. All licenses shall expire on December 31 of the year for which they are issued. The license may be renewed annually upon application to the Department of Agriculture, accompanied by a fee of \$25 for each license, on or before the first day of January of the calendar year for which the license is issued. Each applicant must demonstrate upon written, or written and oral, examination his knowledge of pesticides, their usefulness and their hazards; his competence as a pesticide dealer; and his knowledge of the laws and regulations governing the use and sale of pesticides.

Pesticide Dealer  
Licensing Requirement

No person shall engage in the business of pesticide application within North Carolina unless he is licensed annually by the Board. Each license application shall be accompanied by a fee of \$25 for each applicator's license and an additional \$10 for each aircraft to be licensed. A pesticide applicator is defined as any person who owns or manages a pesticide application business which is engaged in the business of applying pesticides upon the lands or properties of another; any public operator; any private golf course operator; any seed treater; any person engaged in demonstration or research pest control; and any other person who acts as a pesticide applicator and is not exempt from this definition. It does not include:

Pesticide Applicator  
Licensing Requirement

- a. Any person who uses or supervises the use of a pesticide (i) only for the purpose of producing an agricultural commodity on property owned or rented by him or his employer, or (ii) only (if applied without compensation other than trading of personal services between producers of agricultural commodities) on the property of another person, or (iii) only for the purposes set forth in (i) and (ii) above.
- b. Any person regulated by the North Carolina Structural Pest Control Law (G.S. Chapter 106, Article 4C.)

Each applicant must demonstrate upon written, or written and oral, examination his competence as a pesticide applicator or public operator.

No person shall perform services as a pest control consultant without first procuring from the Board a license. The application for a license shall be accompanied by an annual fee of \$25. A pest control consultant is defined as any person who, for a fee, offers or supplies technical advice, supervision, or aid, or recommends the use of specific pesticides for the purpose of controlling insects, plant diseases, weeds, and other pests, but does not include any person regulated by the North Carolina Structural Pest Control Act. Each applicant must demonstrate upon written, or written and oral, examination his competence as a pesticide consultant. However, the North Carolina Pesticide Board may waive the requirement for taking parts of the North Carolina consultant examination provided the applicant has a Ph.D., master's, or bachelor's degree in the discipline pertinent to the category for which a license is desired and provided the applicant has demonstrated successful completion of pertinent academic training or has passed a written or oral examination offered by another state or a professional organization. Applicants will be required to successfully complete written, or written and oral, examination(s) which demonstrates adequate knowledge of pertinent subject matter not specifically completed in academic training including knowledge of applicator state and federal pesticide laws and related subject matter.

Pest Control  
Consultant  
Licensing Requirement

No person shall handle, transport, store, display, or distribute pesticides in such a manner as to endanger man or his environment.

Handling, Storage, and  
Disposal of Pesticides

Every pesticide prior to being distributed, sold, or offered for sale within this State or delivered for transportation or transported in intrastate commerce or between points within this State through any point outside this State shall be registered and such registration shall be renewed annually.

Registration

A registration fee of \$25 for each brand or grade of pesticide is required. An additional \$25 delinquent registration penalty shall be assessed against the registrant for each brand or grade of pesticide marketed in North Carolina prior to registration.

Registration Fee and  
Delinquent Penalty

Registration is subject to refusal or cancellation for cause and upon hearing.

Refusal or  
Cancellation of  
Registration

A deficiency penalty of three times the percentage deficiency times the retail value of any product sold subsequent to sampling and prior to repossession, but not less than \$25 shall be assessed against any registrant of a pesticide found deficient in active ingredients.

Deficiencies

Any brand or grade found to be deficient or excessive in active ingredients, misbranded, adulterated, or not registered is subject to "Stop Sale, Stop Use Orders."

"Stop Sale, Stop  
Use Orders"

Any person who shall be adjudged to have violated any provision of the Law, or any regulation of the Board adopted pursuant to this Law, shall be guilty of a misdemeanor and for each violation shall be liable for a penalty of not less than \$100 or more than \$1,000 or shall be imprisoned for not more than 60 days, or both. In addition, if any person continues to violate or further violates any provision of this Article after written notice from the Board, the court may determine that each day during which the violation continued or is repeated constitutes a separate violation subject to the foregoing penalties. Penalties

following procedure is initiated:

- (1) The application forms are stamped with the date of 5866  
receipt. 5867
- (2) The application forms are examined to assure that all 5869  
copies are properly filled out. Minor errors or deletions 5871  
are corrected by office action.
- (3) Registration fees submitted are verified for correctness 5872  
by matching the number of pesticide products listed on the 5874  
applications with the monies received.
- (4) Pesticide products listed on the applications are examined 5875  
to verify that the required labels or labeling were 5876  
submitted. 5877
- (5) Pesticide products listed on the applications are examined 5878  
along with respective labels or labeling to determine 5879  
whether additional information or data will be required. 5880
- (6) Registration records are checked to determine if the 5881  
registrant has any outstanding "stop sale," "stop use," or 5883  
"removal" orders issued against any of the pesticide 5884  
products listed on the applications or any other pesticide 5885  
product not listed on the applications which bear the 5886  
registrant's name and address and/or is not registered in 5887  
North Carolina:
- (a) If an outstanding "stop sale," "stop use," or "removal" 5887  
order is found on record, the application for 5888  
registration is placed on "hold." 5889
- (b) When the "stop sale," "stop use," or "removal" orders 5890  
have been cleared, processing the application is 5891

## SECTION .0400 - SAMPLES AND SUBMISSIONS

6045

## .0401 SAMPLES; SUBMISSIONS 6047

(a) Personnel of the pesticide and plant protection division 6049  
are authorized and directed to sample, test, inspect, and make 6050  
analysis of pesticides sold, offered for sale, distributed, or 6051  
being applied within this state, at the time and place and to 6052  
such an extent as is deemed necessary to determine whether such 6053  
pesticides are in compliance with the provisions of the North 6054  
Carolina Pesticide Law of 1971.

(b) An official analysis is made from the official sample. An 6055  
official check sample is kept until an analysis has been made of 6056  
the official sample. If the official sample analysis does not 6057  
pass analysis, an official check sample is retained for 90 days 6058  
in order to allow the registrant to obtain a portion of it for 6059  
his own analysis, if he so chooses. Requests for portions should 6060  
be made in writing to the Pesticide and Plant Protection 6061  
Division, North Carolina Department of Agriculture, Raleigh, 6062  
North Carolina, 27611.

History Note: Statutory Authority G.S. 143-446; 6065

Eff. February 1, 1976; 6066

Amended Eff. January 27, 1978. 6067

## .0402 TOLERANCES 6069

In regards to establishing tolerances providing for reasonable 6071  
deviations from the guaranteed analysis statement, the following 6072  
guidelines are adopted: 6073

(1) that, in general, a "passed" judgment on a pesticide 6074  
formulation be made if the analytical results are within 6075  
the following guidelines: 6076

Pesticide Active Ingredient Guarantee, Percent	Allowable Deviation Below Guarantee	6079 6080
1.00	15% of Guarantee	6082
1.00 - 19.99	0.1 plus 5% of Guarantee	6083
20.00 - 49.99	0.5 plus 3% of Guarantee	6084
50.00 - 100.00	1.0 plus 2% of Guarantee	6085

## Additional considerations: 6087

(a) If a sufficient number of samples as determined by the 6090  
pesticide and plant protection division of a given 6091  
product indicate that the manufacturer is not 6091  
formulating the product to achieve the level of the 6092  
guarantee, an administrative judgment may be made to 6093

## AGRICULTURE - PESTICIDE AND PLANT PROTECTION

10D .0400

warn the formulator against the practice of formulating products in a manner only to stay within the allowable deviation from the guarantee.

- (b) A sample result falling outside of the guidelines may not necessarily be "deficient" if one of the following factors could reasonably be expected to have contributed significantly to the off-limits analysis:

- (i) special sampling problems, such as fertilizer-pesticide mixtures and certain granular products;
- (ii) accuracy, specificity, reproducibility, etc., of the methods used when applied to the particular formulation;

- (2) that, allowable deviations, similar to those for "deficiencies," are not applicable to "overages." Each sample analysis will be judged individually as to whether or not the overage is excessive by using the following criteria:

- (a) no illegal residues resulting from use according to directions;
- (b) no significant additional hazard to applicator or user;
- (c) no significant damage to non-target organisms or the environment;
- (d) stability of ingredients and the need for "over-formulating";
- (e) accuracy, specificity, reproducibility, etc., of the methods used when applied to the particular formulation.

History Note: Statutory Authority G.S. 143-446;  
Eff. February 1, 1976;  
Amended Eff. January 27, 1978.

## .0403 PESTICIDE SAMPLING PROCEDURES

- (a) Procedures for sampling pesticides vary in accordance with the type of pesticide to be sampled and the type of sample to be taken.

- (b) Pesticide samples are classified according to the following categories and procedures:

- (1) "Formulation samples" must be taken from the manufacturer's original unopened container using clean sampling equipment so as to avoid any contamination. Judgments are based on tolerances for reasonable deviations from the guaranteed analysis statement.
- (2) "Pesticide use samples" are obtained by division personnel who sample pesticides from the consumer as it is being applied or during preparation for application. Judgments are made depending on the

AGRICULTURE - PESTICIDE AND PLANT PROTECTION

10D .0400

directions for use contained on the registered pesticide label. 6143

- (3) "Pesticide commodity samples" are obtained by division 6144  
personnel who are authorized to sample commodities and 6146  
submit them for analysis in order to determine whether  
properly registered pesticides have been applied 6147  
according to label directions. 6148
- (4) "Pesticide incident samples" are obtained by division 6149  
personnel who are authorized to take samples, inspect, 6150  
and investigate any incidents in which pesticides are 6151  
reported or thought to be involved. 6152

SECTION .0600 - PESTICIDE AND PESTICIDE  
CONTAINER DISPOSAL6625  
6626

## .0601 DEFINITIONS

6628

The following definitions will be in effect throughout 2 NCAC 6631  
10D .0600:

- (1) "Complete destruction" of pesticides means alteration by 6632  
physical or chemical processes to inorganic forms. 6633
- (2) "Container" means any package, can, bottle, bag, barrel, 6634  
drum, tank, or other containing device (excluding spray 6635  
applicator tanks) used to enclose a pesticide or 6636  
pesticide-related wastes. 6637
- (3) "Excess pesticides" means all pesticides which cannot be 6638  
legally sold or which are to be discarded. 6639
- (4) "Inorganic pesticides" means noncarbon-containing 6640  
substances used as pesticides. 6641
- (5) "Heavy metals" means metallic elements of higher atomic 6642  
weights, including but not limited to arsenic, cadmium, 6643  
copper, lead, mercury, manganese, zinc, chromium, tin, 6644  
thallium, and selenium. 6645
- (6) "Metallo-organic pesticides" means a class of organic 6646  
pesticides containing one or more metal or metalloid atoms 6647  
in the structure. 6648
- (7) "Organic pesticides" means carbon-containing substances 6649  
used as pesticides, excluding metallo-organic compounds. 6650
- (8) "Pesticide incinerator" means any installation capable of 6651  
the controlled combustion of pesticides, at a temperature 6652  
of 1000 degrees Centigrade (1832 degrees Fahrenheit) for 6653  
two seconds dwell time in the combustion zone, or lower 6654  
temperatures and related dwell times that will assure 6655  
complete conversion of the specific pesticide to inorganic 6656  
gases and solid ash residues.
- (9) "Pesticide-related wastes" means all pesticide-containing 6658  
wastes or by-products which are produced in the 6659  
manufacturing or processing of a pesticide and which are 6660  
to be discarded, but which, pursuant to acceptable 6661  
pesticide manufacturing or processing operations, are not 6662  
ordinarily a part of or contained within an industrial 6663  
waste stream discharged into a sewer or the waters of the 6664  
state.
- (10) "Safe disposal" means discarding pesticides or containers 6666  
in a permanent manner so as to comply with these 6667  
procedures and so as to avoid unreasonable adverse effects 6668  
on the environment. 6669
- (11) "Sanitary landfill" means an approved disposal facility 6671  
employing an engineered method of disposing of solid 6672

## AGRICULTURE - PESTICIDE AND PLANT PROTECTION

10D .0600

wastes on land in a manner which minimizes environmental hazards by spreading the solid wastes in thin layers, compacting the solid wastes to the smallest practical volume and applying cover material at the end of each working day.

- (12) "Specially designated landfill" means a landfill at which complete protection is provided for the quality of surface and subsurface waters from pesticides, pesticide containers and pesticide-related wastes deposited therein, and against hazard to public health and the environment. Such sites should be located and engineered to avoid direct hydraulic continuity with surface and subsurface waters, and any leachate or subsurface flow into the disposal area should be contained within the site unless treatment is provided. Monitoring wells should be established and a sampling and analysis program conducted. The location of the disposal site should be permanently recorded in the appropriate office of legal jurisdiction.

History Note: Statutory Authority G.S. 143-441;  
Eff. February 1, 1976.

## .0602 DISPOSAL OF PESTICIDES

(a) In considering disposal techniques, first preference shall be given to procedures designed to recover some useful value from excess pesticides and containers. Where large quantities are involved, the excess material should be used for the purpose originally intended, provided this use is legal.

(b) Organic pesticides which do not contain mercury, lead, cadmium, or arsenic may be disposed of by incineration at temperatures which will ensure complete destruction.

(c) Incineration is not applicable to those pesticides which contain heavy metals such as mercury, lead, cadmium, or arsenic, nor is it applicable to those organic pesticides or other metallo-organic pesticides which have not been treated to remove the heavy metals.

(d) If incineration is not applicable or available, disposal in specially designated landfills is an alternative.

(e) All disposals of excess pesticides and pesticide-related wastes shall be instituted under approval and supervision of a pesticide disposal committee of the North Carolina Pesticide Board. This committee shall receive application for the desired disposal task, review each problem based on its individual circumstances and complexity, and submit a recommended solution plan to the disposal applicant.

- (2) the identity of nontarget areas and safety hazards located on or adjacent to the target areas.
- (e) Spray and spreading equipment shall be thoroughly rinsed after each agricultural aircraft operation except when the next agricultural aircraft operation will be made using the same pesticide, or if another pesticide, one which by its manufacturer's recommendations is compatible with that previously in the equipment, and will not result in any adverse effects or illegal residues. Rinsing shall be conducted in an area where an environmental hazard will not be created by the drainage or disposal of waste materials and conducted with methods which will not create an environmental or human hazard.
- (f) During application, the flow and mixture of the pesticide(s) shall be uniform. Pilots and contractors shall utilize equipment which will maintain a uniform mixture and flow during application.
- (g) Pilots and contractors shall use and operate, in any agricultural aircraft operation, aircraft equipped with spray or spreading equipment suited, according to its manufacturer's recommendations for the pesticide(s) to be applied. Such a report shall be made immediately to the secretary of the board, or designated alternate, and shall include:
- (1) the name of the pilot,

 applicators of liquid pesticide formulations include and utilize 7601  
 in their schedules and procedures the following methods: 7602

 10 feet above the target, except where obstructions in or 7611  
 adjacent to the target would endanger the safety of the 7612  
 pilot while applying pesticides at that altitude. This 7613  
 restriction shall not apply to ultra-low volume (ULV) 7614  
 applications. 7615
  - (4) All applications of the following liquid pesticide 7614

# Official Analyses of Pesticides 1979

## Definitions of Decisions

A summary of pesticides analyzed and the results of samples determined to be at variance from the guarantee are tabulated in the following pages. For the reader's ready interpretation of the report, those designations used are explained in the following paragraphs.

"PASSED" signifies that the labeling and composition of the product satisfactorily complied with guarantees and requirements.

"DEFICIENT" signifies that one or more ingredients fell significantly below the guarantee. Such products are placed under "Stop Sale Orders" and are removed from the market for reprocessing or relabeling. A deficiency penalty is also assessed against the manufacturer.

"EXCESSIVE ACTIVE INGREDIENT" indicates a significant excess of one or more active ingredients. Such formulations could be harmful to the user and/or result in excessive residues.

"ADULTERATED" indicates that quantities of undeclared active ingredients were present above established tolerances. Such lots, batches or brands are stopped from sale and other appropriate action taken.

"MISBRANDED" signifies that labeling failed to conform to requirements. Omission of some item or statement is a more common flaw. Among these may be proper ingredient listing, skull and crossbones, "Poison" in red and antidote where these are required; net contents by weight or volume; class of, and unsulfonated residues of petroleum oils; and percentages of alkaloids instead of crude product such as sabadilla seed.

In some instances of misbranding, the defect appeared to be inadvertent and of a minor nature. In others, removal from sale is necessary.

"NOT REGISTERED" signifies that the product was not registered at the time it was sampled. Any such product is required to be registered prior to release from "Stop Sale Order." A delinquent registration penalty is also assessed against the manufacturer.

As has been the practice in past work, analyses were made largely for those ingredients which were considered of major importance, as, for example, methyl parathion, whereas the related compounds were not checked. For sake of brevity, active ingredients not checked are not listed in Table II. This should not be taken to indicate that manufacturers did not include them on labels. This procedure has been followed because it enables a broader coverage of all products offered for sale.
